

- The Educational Leader provides resources/templates to Educators to support sound pedagogy and exceptional practice.
- The Educational leader empowers Educators to bring a quality educational program to life by providing direction and support where needed guided by the educational principles and practices.
- The Educational Leader builds competence and capability by reviewing Educators evidence of learning. They then give feedback on how to extend on their programming within their analysis of learning occurring, potential planning ideas to be implemented and any follow-up to extend on learning during monthly Educator home visits.
- The role of the educational leader is to offer educators support as they navigate to effectively implement the planning cycle to enhance programs and practices. With the aim of an effective and efficient programming cycle that is meaningful, manageable and meeting obligations.
- The Educational Leader conducts reflective discussions on forming a holistic approach to 'understanding the child' by developing an Educator's knowledge of developmental milestones, learning trajectories, red flags, the outcomes of the EYLF and MTOP, children's and family's beliefs, values culture, home life, interest and observed influences from popular culture.
